[Myelin Media Releases A Patch for Xbox Version of STACKED with Daniel Negreanu](#)

Xbox version patched

Myelin Media released a patch for the Xbox version of STACKED with Daniel Negreanu. The following patch is now available for download via Xbox Live, and it will address certain online and offline experiences.

1. Loss of accumulated bankroll. The game incorrectly resets a player's online bankroll to \$2,000, when they log on to Xbox Live. After the installation of the patch, player bankrolls will be properly tracked and saved.
2. The **STACKED** Hall of Fame and Leaderboards are not updating correctly. After installing the patch through Live, the Leaderboard and Hall of Fame will properly track a person's progress in Multi Table Tournaments and other online games.
3. Ask Daniel. Daniel's Poker tips will be re-calibrated to correct for a few instances when the tip seems off relative to the particular situation.

Another auto update will be available shortly to address the dirty disc error issue. MTV STACKED Masters Tournaments for Xbox begins tonight with the "MTV Showdown #5".
