[MyxerTones Reported Record Website Traffic](#)

How to download original mobile features fast and free

With the new trend to personalize your mobile phone on the run, the number of regular downloads from sites that offer a wide variety of content to anyone who wants an original look for his/her device, is rapidly increasing. It's reported that more than one million mobile phone owners a month are downloading content from MyxerTones, a record figure for the revolutionary platform. Teenagers seem to be the main target as they change the look of their mobile phones daily. As an adult, you have to admit it's really enjoyable to download jokes or jingles when traveling to work or college, and quite fun to play a sound of a wildlife species on your mobile in real time. Just think how relaxing it would be to watch a comedy video on your mobile device while traveling to work. Fans can easily communicate to their favorite artists and download wallpapers and ringtones from the websites fast, easy and of course, free. "Myxer Tones is experiencing such rapid popularity because our website makes delivering [ringtones](#) and other content to the mobile marketplace simple, even for small organizations and individuals with limited resources" said Myk Willis, founder and chief technology officer of MyxerTones. The best news is that you don't need a PC anymore to access and download the data, so regardless of the location and time, you can get your favorite wallpaper in a matter of seconds directly on your mobile screen without extra cost. With the number of musicians, bands and recorded labels rapidly increasing, it is not hard to imagine the future growth of the number of people that access the website, especially since the companies are operating major simplifications of the process.
