## [Naruto: Ninja Destiny Unlockables \(DS\)](#)

### *A complete list of character unlockables*

Everything seems possible in the Village Hidden in the Leaves, where we can find Naruto Uzumaki, the ninja in-training that wants to become the best ninja in history but cares more about pranks and other not-so-ninja related stuff. This is the (very) compressed story of the anime series Naruto, the same that inspired many games up to date and that still has the potential to create even more. A new Naruto title will join the "family" - [Ninja Destiny](#), the first ever 3D fighting game based on the animated series. So, if you ever wanted to see the [Naruto](#) characters fighting against each other on the portable Nintendo console, now is your chance. Players will have to use both screens and they will definitely enjoy this high energy combat sim, the top screen being used for the combat itself while power ups can be used on the touch screen. We have prepared a list with the characters you can unlock and with what are the requirements for doing so.

**UNLOCKABLES**

**Play as Gaara** Complete Story mode under the Hard difficulty setting. **Play as Gai** Complete Story mode without using any continues. **Play as Itachi** Complete Arcade mode with default characters. **Play as Jiraiya** Successfully complete Arcade mode as Tsunade. **Play as Kyubi Naruto** Complete Arcade mode with Itachi. **Play as Orochimaru** Successfully complete Arcade mode as Jiraiya. **Play as Sasuke Cursed Seal 2** Unlock all other characters, then complete the Arcade mode as Sasuke again. **Play as Temari** Complete Story mode under the Normal difficulty setting. **Play as Tsunade** Complete one of the following tasks to unlock Tsunade:- Unlock Gai, Temari, and Gaara. This can be done by completing Story mode under the Normal or Hard difficulty setting without using any continues. - Successfully complete Story mode under the Difficult setting using no continues. Here is how Naruto: Ninja Destiny looks like:
