Nokia E90 in black - official image Nokia

Nokia E90 Communicator is now available in a brand new all-black edition, this being the third version of the popular Eseries handset, after the red and mocha-brown one. Besides the official images with it, there are also several live pictures with the black E90, appeared on [Daily Mobile](#). Although the black edition of E90 is featured on Nokia's official website (at [this address](#)), together with the original ones, we're not sure yet where exactly users can buy it from. Anyway, they should know that, regardless of the color, the E90 has a pretty high retail price, around 620 Euros (or \$980). The new E90 is almost completely black, even its left-side corners (that have a metallic finish in the other two versions) being touched by the new color. Since black is elegant in almost any situation, we have to admit that the Communicator looks quite nice in its new case. Furthermore, besides the change of look, the black E90 is said to bring several improvements. As you may or may not know, the original E90 has a little problem with its internal keyboard, as it touches the internal screen when closed and damages it in time. Well, it seems this problem no longer exists with the black E90, so the smartphone can now be considered almost flawless. The features that make E90 a [high-end](#) business phone include: an internal 4-inch display with 800 x 352 pixels and an external 2-inch one with 240 x 320 pixels (both supporting 16 million colors), a full QWERTY keyboard plus an alphanumeric one, Symbian S60 3rd Edition, quad band GSM and HSDPA connectivity, built-in GPS, pre-installed maps, Wi-Fi, full HTML browser, email, a good 3.2 Megapixel camera (with auto focus, flash and video recording), secondary video-call camera and so on. Maybe the single drawback of E90 is related to its dimensions: 132 x 57 x 20 millimeters (at 210 grams). But, after all, this is no ordinary phone and its two displays plus the other specs kind of compensate for the big size.
