## **PSP Dedicated Largest Download Database**

### *Games, Movies, Wallpapers and Software*

With the increase in quality and popularity of portable gaming, new businesses have emerged to capitalize on this immeasurable growing market. One company ahead of the rest, at least for the moment, is Music Explosion, which started developing a support network when portable gaming first hit the market a few years ago. It seems that Music Explosion has created a database with over 20 million items available for download, providing access to the largest Sony PSP database available. Although games are in the spot light, the web site includes a wide variety of games - adventure, strategy, and racing games, there are also movies, wallpapers and software available in the network. According to database statistics, 'Daxter' is the most popular downloaded item for PSP users. The 2005 game is based around Daxter who is a small, but loud animal that is on a mission to save his friend, Jak, who is being kept in prison by the Baron. Daxter is just ahead of the recently released 'Syphon Filter: Dark Mirror'. The third on the download list is 'World Soccer Winning Eleven 9', a soccer based game which gained much of its popularity when the famous FIFA World Cup started in Germany. At [www.musicexplosion.biz/unlimited-psp-games/phc/](http://www.musicexplosion.biz/unlimited-psp-games/phc/), for \$34.95 members can download from one of the largest file network. Members with the bonus movie download membership (extra \$9.95) also receive PC to PSP transfer software to watch movies either with their PC media player software or through their PSP's.
