## [PSP to TV Projector](#)

### *The most anticipated and innovative PSP accessory*

Fire International announced the imminent release of the most anticipated and innovative PSP accessory available: the Blaze PSP-to-TV Projector. The PSP to TV Projector connects a PSP to any TV, LCD, Projector or Plasma screen with AV connections. The PSP to TV Projector clips neatly to the top of the PSP, and requires NO internal modification to the console. Within seconds, your PSP games, UMD Movies, Music and Photos are displayed on your TV! Managing Director of Fire International, Jason Cooper said "The PSP to TV Projector offers users the first opportunity to view their PSP content on the screen of their choice. From the feedback we have received from PSP owners, the ability to use their console with the TV was undoubtedly the No. 1 product on their wish lists. Unique titles such as the PSP only GTA: Liberty Stories is a typical example of an "exclusive to PSP" title that can now be enjoyed on the big screen". The Blaze PSP to TV Projector is due for release in December 2005 and will be available for advanced order online and from major video game retailers.
