Pharaoh - Cheats and Hints

It's good to be the Pharaoh

After three games in the Roman Empire it was time to migrate to warmer climates so the franchise moves into Egypt. The ultimate goal was to reach the Pharaoh status (hence the name of the game) using the same gameplay elements of Caesar. Like any game that's developed for years on end, evolving from title to title, Pharaoh has become an almost perfect game, with few bugs and one heck of a replay cycle. The game is quite easy to understand but if you need a small push along the way, here are a few codes. **Cheats**1000 debens - Treasure Chest City attacked by hippos - Hippo Stomp City attacked by land - Mockattack1 City attacked by sea - Mockattack2 Destroy all military ships - Fury of Seth Destroy part of next invasion group - Spirit of Typhon Destroy single storage yard - Grenow Exports decrease for one year - Bird of Prey Exports increased for one year - Pharaohs Glory Festival for all the gods - Meow Flood plain farms is destroyed by next flood - Underworld Harvest from flood plain farms is doubled after next flood - Life from Death Houses and bazaars full of goods - Cat Nip Increase number of already available hippos - Side Show Inundation decreased - Mummys Curse Inundation increased - Bounty Level skip - Pharaohs Tomb Lower kingdom rating - Mesektet Plague strikes city - Kitty Litter Population includes homeless - Help Homeless Raise kingdom rating - Sun Disk Shipwrights, weavers, and jewelers stocked with materials - Noble Died Storage yard at maximum - Supreme Craftsman Troops destroyed - Seth Strikes Troops protected - Typhonian Relief Upgrade all residences - Living Large Various best houses destroyed - Cat Fight Various industrial buildings destroyed - Big Dave **Cheat mode** This procedure involves editing a game file; create a backup copy of the file before proceeding. Start Windows Explorer, and highlight the "Pharaoh_Model_Normal.txt" file in the game directory. Press the Right Mouse Button, and select "Properties". Remove the check mark from the "Read Only" box, then select "OK". Use a text editor (like Notepad) to edit the "Pharaoh_Model_Normal.txt" file, using the instructions contained within the file as a guide. After saving your changes, use Windows Explorer to place the check mark back in the "Read Only" box. **Start level with double Debens:**To start a level with twice the amount of Debens, choose a mission and start it. Then, click "Restart Mission" in the file menu. This only works once per mission. **Place two Sphinx together :**Place one Sphinx and demolish it. Select to place it again and undo before placing it. If done correctly, you will have two Sphinx, buy they will be built together as one.
