[Pokémon Mystery Dungeon: Blue Rescue Team Cheats and Passwords \(GameBoy Advance\)](#)

Gotta' catch 'em all

This is probably the weirdest genre in the gaming industry, as it sounds like an ugly mutant, but it surely doesn't look like one. Mystery Dungeon is a semi-turnbased dungeon crawl and it's compatible with the Red Rescue Team version thanks to the dual slot features of the Nintendo DS. To choose the initial [pokemon](#), you'll have to take a personality test and I must say that I was puzzled to see humans transformed into [pokemons](#) in this title. You'll also get the chance to have a poke partner and you'll have to be careful with your picks as some pokemons are sworn enemies, so you won't be able to make them partners. We provide you with passwords for the special missions that can be played if the normal ones are too easy for you: **PasswordsSpecial Missions**When you start the game, before you load your game, go to Wonder Mail and type in the passwords. After you have beaten Rayquazza and the credits have rolled, you will gain access to Luminous Cave which is found at Whiscash Pond just north of the Pokemon Square. There will be a commotion in Pokemon Square prompting you to go there and learn about evolution. Then, the next time you try to leave and go on any mission, your partner will stop you and tell you how to change leaders and travel using just one pokemon. Enter Luminous Cave with just the pokemon that you wish to

evolve. The pokemon that you are evolving must meet the required level for evolution and in some cases, might need an item such as a moon stone or sun stone. A link cable can also be used. To check if your pokemon is capable of evolution, check its summary page and under evolution it will be Possible, Not Now, or Not Anymore.

RanksTo get higher ranks, get the required amount of Rescue Points.
