[Puzzle Bobble Cheats and Unlockables \(DS\)](#)

Another world and unlockables

Puzzle Bobble (also known in the United States, Canada, and sometimes in Europe as Bust-a-Move) is an **arcade** puzzle game series created by Taito and contains elements of Sega's Columns and Atari's Breakout. At the top of the rectangular playing arena, a number of bubbles of various colours are placed in a prearranged pattern at the start of the level. At the bottom of the screen, the player controls the angle of a fixed cannon that fires semi-randomly coloured bubbles in a straight line. The bubbles, when fired, travel in straight lines, possibly bouncing off the side walls of the arena, before eventually coming to rest either touching one or more of the existing bubbles, or at the top of the arena. If the bubble manages to come into contact with identically coloured bubbles, forming a group of three or more, those bubbles, and any bubbles hanging only from them, are removed from the field of play, and points are awarded depending on how many bubbles are removed from the screen at once. CHEATSSound test Press the following combination: Select, A, B, Left, Right, A, Select, Right at the main menu for a small sound test.

Another World Complete all the "A" levels in Puzzle mode. The code to Another World will appear after completing the final puzzle in level 5-A. After you take care to note the code and be sure it's safe, you will have to press A, Left, Right, A at the title screen if you want to play as the Evil Sorcerer in the level Another World.

UNLOCKABLESChakkun In order to unlock it, you will have to complete Puzzle Set Z then complete Puzzle Mode in the DS Style. **Bonus Puzzle sets** You will have to get a high score for all the default puzzle sets in order to unlock the final four puzzle sets. Here is a special Japanese edition of the game:
