TRENDYFLASH SITE BUILDER IN ACTION SOFTPEDIA

[Quickly Customize and Publish Flash Websites with TRENDYFLASH SITE BUILDER](#)

Deploy Custom Flash websites without ActionScript knowledge

The impact of a Flash driven website over the visitors or customers browsing experience is well-known. On the other hand, any Flash website design or a single element could bring to any web presence unique features. The development of Flash websites require advanced knowledge of ActionScript and also expensive software. For people that do not have Flash programming knowledge, user-friendly desktop solutions exist. [TRENDYFLASH SITE BUILDER](#) is a Windows software that allows you to create professional Flash websites only with a few mouse clicks and without the need to know web-design or ActionScript programming. All website creation process is conducted by a simple to use and understand wizard. You can select one of various background themes and Flash sites designs. Then you should edit the title, a slogan and a welcome message that will appear on the home page. You are allowed to set a maximum number of pages that your website must have. Beginning from the home page you will be able to add text, links, images (logo), sounds and more. The elements positions in webpages can be easily modified with drag-and-drop actions. Images and text can be formatted. For example, images can have different transparency or size values. After every modification or editing action, the Flash website is automatically previewed in the same window. The website navigation menu is also automatically made, based on the number of existing website pages. This Windows application software allows you to generate Flash websites search engine friendly, by the automatic creation of Title, Description, Keywords meta-tags in the publication process. The Flash website can be published on web or CD with various display possibilities, such as full screen movie or other size and on screen movie position. TRENDYFLASH SITE BUILDER will help you save a lot of time and to obtain a professional web presence both for a personal or business website, because the existing built-in templates and animations have a high quality and there is possible an infinite number of combinations between all website elements.
