## [Race Driver: GRID - Achievements \(Xbox 360\)](#)

### *The best racing game to date*

GRID is the next game in the Race Drivers series, made famous by the Toca titles. It is no different from what we would expect, a combination between a simulator and an arcade with emphasis on the latter. The most shocking feature is, of course, the level of damage a car can endure and the movie-like quality of gameplay. It will have three major locations: Europe, Japan and US. As you might have guessed, Europe is reserved for super cars like Aston Martin Koenigsegg and Pagani, Japan is dedicated to drift racing and US mostly to beautiful muscle cars. The game also features an extensive multiplayer and can support adrenaline pumping four-player races, leaderboards and custom series on user tracks. Gamers can also upload and download new tracks to GRID servers. This amazing racing game is set to be launched on June 3, 2008. Be prepared and read the achievements below.

**Achievements**

- Spin & Win - 10 points Complete a 360° spin and still win the race
