## [Ratatouille Cheats \(Xbox 360\)](#)

*A complete list of codes to use in-game*

**Ratatouille** the video game is based on the successful animated movie by Pixar. The game was developed by Heavy Iron Studios and released by THQ on virtually every format: Gamecube, PS2, PS3, Nintendo Wii, DS, PSP, Xbox, [Xbox 360](#), Game Boy Advance, Windows, Mac and mobile phones (there are no less than twelve systems it was released on - probably a record). The Xbox 360 version was launched on the 26th of June 2007 in the US, the 2nd of August 2007 in Japan, the 9th of August 2007 in Australia and the 28th of September 2007 in Europe. The reviews, however, were generally low since the game suffered from the "movie adaptation" syndrome and had pretty poor quality. We know that true gamers play all these games just for fun, as they should and not in order to achieve specific point landmarks to prove their friends they are very cool, but we also know that sometimes you just can't live without achieving everything possible with a title you really enjoy. If that's the case and you want to know exactly what to look for, we have prepared a full list of cheats. Good luck!

**CHEATS** Load a saved profile or create a new one. Then, select the "Extras" option at the main menu. Select the "Gusteau's Shop" option, then the "Secrets" option. Choose a "Code [number]" option and enter the corresponding cheat code to unlock that option. After a cheat option is unlocked, click on its name to enable it. Unlocked and enabled cheat options will be saved with the current profile. However, some cheat options cannot be disabled.
