## **Robbie Williams Treads on Guy Ritchie's Toes**

*'She's Madonna' is not about the diva, but about her husband's love life*

The British singer may have caused the wrath of the famous director by writing one of the tracks from his latest album not as a tribute to the Queen of Pop, as he led everybody into believing, but as a direct reference to Ritchie's sex life. 'She's Madonna' aims at Guy's relationship to TV presenter Tania Strecker, prior to him meeting Madonna. The two broke up after the director met the diva and it seems that his parting words sounded something like 'Look, you know I really love you, but she's Madonna'. After having her heart broken by the director, Tania sought solace in the arms of unsettled Robbie and, chances are that she might have told her this little story. And Robbie, like a true artist that makes his art out of everyday experiences, put it into a song. He and Tania split after four months of dating. The most curious thing of all that is that Madonna herself got herself fooled into believing that the track is actually a tribute to her and, when Robbie first played her a sample of the song, gave it a thumbs-up. A source from the recording studio said: 'It seems Robbie always had this conversation [between Guy and Tania] in the back of his mind for a song' and then, went on to discuss about Ritchie's possible reaction: 'Guy's not going to be happy that all this is being dredged up again. Although everyone concerned has moved on, it's a bit out of order that Robbie has used it as the basis for one of his songs'. 'She's Madonna' has been scheduled for release early next year.
