[Robotech: Battlecry - Cheats, Unlockables, Hints and Glitches \(Xbox\)](#)

Actually, you can use the Super Veritech armor anywhere

The game follows the [exploits](#) of ace pilot Jack Archer. After serving as a mercenary in the Global Civil [War](#), flying both with and against Roy Fokker, the former made quite an impression on the latter, which made him recommend Jack for the RDF. The early stages of the game cover Jack's final training and his fighting during the Battle of Macross Island, Jack not being close enough to the SDF-1 when space folds to Pluto and being left behind on Earth, rejoining his friends upon their initial return home. The majority of the game is set in the Post-Rain of Death era and involves Jack and his Wolf Squadron defending various human outposts against Malcontent Zentraedi forces led by the Zentraedi warlord Zeraal.

Cheats
Cheat modeStart a new game or load a previous one. Highlight "Options" then hold L + R and press Left, Up, Down, A, Right, B, Start to display the code entry screen. Note - This also unlocks Queadluun-Rau in versus mode. *Wolf Leader meda*Complete the To The Death mission. This also unlocks the VF-1R in story and versus modes and the Wolf mech colors. **Gameplay Hints**
*Fully charged in sniper mode*Enter sniper mode, then hold Fire to charge. Once fully charged, exit sniper mode while holding Fire. The next time you want to go into sniper mode, hold Fire as you change to that view. You will now have a fully charged weapon the moment you change into sniper mode. *Using missiles on the fly*Most of the time using the battloid mode is useful for

counter-missile efforts. However, with some practice you can learn to switch to jet or guardian (works either way), immediately fire a volley of missiles, then switch back to battleoid. This allows you to launch a strong assault while keeping missiles off your back.

Quicker missile targeting Missiles do not take that many shots to detonate. A useful trick is to use short bursts of fire (releasing and pressing Secondary Fire rapidly and quickly). This gives you more of a chance to eliminate a lot of missile volleys in a much shorter time.

Knives Edge To complete this level easy, get directly under Sckarred's feet and keep shooting.

Glitches *Use The Super Veritech armor anywhere* After you receive the Super Veritech, you are only able to play with it on space levels. However, If you have not completed the game yet, start one of the story levels that will allow the Super Veritech to be used. Once you have completed that level with the Super Veritech, select "Continue" and it will put you in next level to be completed, regardless of whether it is in space or not.

Michael DeVore. *Floating Veritech* In the Train Depot versus level, have one player stand on one of the smoke columns. Then, have the other player shoot it out from under them in sniper mode. The column will collapse, and the player standing on it will float in midair. Do not shoot the player on top.
