[Rollercoaster Tycoon 3, Wild and Soaked Cheats](#)

Mammy, I want to go to that new amusement park!

The most renowned amusement park simulator series got to the third title. Even more breathtaking rides are available along with themed scenery. The guests never seem to get tired of the marry-go-rounds and the caterpillar mountain rouse and they come back to your ever more attracting parks to pay big time to get scared and enjoy all the junk food your research center comes up with. The great part about Rollercoaster Tycoon 3 is that it comes in all 3D graphics and you are finally allowed to get on those rides you've worked so hard to create. Generic, Spooky, Western, Adventure and Sci-fi themes are available. Moreover, you can even create your own family members and friends and add them to your park. Get building on that Mega Coaster and if you get into trouble you can always quickly consult the following list of cheat codes. **Cheat - The Easy Way to Make Money** Change a guest's name to John D Rockefeller. Do it all over again until you get to the amount you were hoping for. **Cheat - The Easy Way to Increase the Park's Value** Change a guest's name to Andrew Gillett. Do it all over again until you get to the amount you were hoping for. **Cheats - Name Calling** Rename one of your park guests the code to get the desired effect. Atari - all of your guests start laughing. Shifty - dancing is fun and your guests will do just that. Chris Sawyer - all of your guests start jumping with joy. Mouse - guests stand around looking down at the ground (in search of a mouse). Make Me Sick - all guests get sick. ATITech - Peeps move fast for 20 seconds. Sam Denney - all guests ride every coaster before leaving. Jon Roach - all guests ride all non-coaster rides. David Braben - unlimited launch and chain lift speeds. John Wardley - removes height restrictions when building coasters. Frontier - all rides and coasters won't ever break down. Andrew Thomas - decreases track friction (which can help when importing some RCT1 or 2 coasters into RCT3; needs update #1). Guido Fawkes - gives access to the advanced Fireworks editor. D Lean - Flying Camera path editor. James Hunt - get the buggy to actually ride through the park. M Brookes - enables walls and scenery items to be placed on path edges. Jonny Watts - see through the eyes of the guest. Atomic - big explosion taking place here. PhotoStory - guests take photos. A Hitchcock - vicious ducks appear. Ghost Town - new guests are not allowed to enter, but the current guests may leave if so they desire.
