Running Out of Beer? Then Brew Your Own!

With The Beer Machine 2000

Summer is here, so for quite a lot of people it's open season for barbecuing. And what's the favorite drink at such parties? Well, beer, of course. But what's to be done when there's no more beer in the fridge, or the stores are all closed, or you simply don't really like the way usual beer tastes like? The solution is simple: brew your own beer with the Beer Machine 2000. This device is quite extraordinary, especially for those people who know their beer well enough to brew it. Thus, the Beer Machine 2000 has a special brewing tank, but also a custom pressure gauge to indicate brew quality, carbonation level, and dispensing pressure. In order to assure optimum brewing conditions for your favorite drink, the device also sports a carbonation unit and pressure relief system. Moreover, to maintain that old pub feeling, the device has two stylish taps included. The Beer Machine 2000 isn't too large (30.48 cm x 33 cm x 25.4 cm), so it can fit perfectly in just about any refrigerator, and it is capable of producing 12 servings of 330 ml, quite enough for personal use, but not that much if you're considering having some friends over. However, since one of these things is just 112 dollars, you could buy more than one, and turn your patio into a real pub. We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
