[Sagem my600v on Vodafone](#)

Good enough for 'shoot, share and shred' snaps

Featuring a 262k color 1.9 inch TFT display with a 176 x 220 pixel resolution, 16MB of internal memory, [MiniSD](#) card slot for memory expansion, music player and Bluetooth, the Sagem my600v is a pretty average device. The built-in VGA Camera is not exceptional, but good enough for taking snapshots of what interests you. Even though it is a 3G video call capable phone, [Sagem](#) my600v does not have a second camera, so you can either see the person you are talking to or be seen by them. The candy-bar styled my600v measures 110 x 48 x 16 mm and weighs 99g, has a very simple, appealing design and it is very easy to carry and use. It is reported to have a talk time of 4 hours and a standby time of approximately 400 hours. Also, if you want to listen to music, you will have to purchase a headset, as the mobile phone doesn't come with one. This handheld can be purchased exclusively on Vodafone, with a pay as you talk tariff, and has a price tag of £63 if you buy it online, on their website.
