[SanDisk's e200 Mp3 Player Has 6 Gigabytes of Storage Capacity](#)

SanDisk unveiled its e200 and c100 Mp3 players

At the Consumer Electronics Show in Las Vegas, SanDisk unveiled its e200 and c100 Mp3 players. The top-of-the-line SanDisk Sansa e200 MP3 player features a large color screen and 6-gigabytes (GB) of storage capacity that makes it ideal for listening to music or viewing photos and personal videos. The company's Sansa c100 is a value-conscious MP3 player with a color screen and compact size. "Music is an incredibly important part of the digital lifestyle, where the emphasis is on accessibility of music, styling and ruggedness on the go," said Eric Bone, director of audio/video product marketing at SanDisk. "These new players have a rich set of features, a high-strength industrial design and a friendly price tag that we believe will appeal to anyone who appreciates music on the go." The Sansa e200 series features a slim new design and a 1.8-inch (4.572 cm) [TFT color screen](#) (QCIF+) along with high-quality audio, photo viewing and video playback capabilities. It offers a 6GB capacity that holds more than 1,400 MP3 songs. It is also available in [2 and 4GB models](#). Its large color screen is ideal for easily viewing playlists, photos and personal videos. Its distinctive, high-strength and lightweight back cover is made with an advanced Titanium alloy from Liquidmetal Technologies that is stronger than steel and highly resistant to scratches and wear. It includes a rechargeable Lithium-Ion battery for long playtime and can be replaced by the customer to ensure the player provides many years of continuous service. Dimensions of the Sansa e200 are 1.7 in. wide x 3.5 in. long x 0.5 in. high (4.4 cm wide x 8.9 cm long x 1.3 cm high). The Sansa c100 series is for the value-conscious consumer who wants a high-quality, large capacity [music player](#) with a color screen. It is available in 1 and 2GB capacities. The 1.21-inch (3.07 cm) color screen can be used to view thumbnail-size digital images such as album art or create a slideshow with music. The Sansa c100 line will support Microsoft PlaysForSure subscription and downloads compliance for easy accessibility to a wide range of music and music stores. It also includes an FM digital tuner with 20-channel presets, FM on-the-fly recording and voice-recording capabilities with its built-in microphone. The new player uses a single AAA battery to power the unit and features a universal accessory connector for the easy addition of future accessories.
