## Scarface: The World Is Yours - Cheats and Fixes

*What would have happened if Tony Montana wouldn't have died*

Scarface: The World Is Yours is an action adventure similar to the GTA franchise. Unlike other games that tried this proven recipe, Scarface really managed to make itself noticed. Some might say that the gameplay is way too similar but in fact, it's just extremely well implemented. Overall, it's a great game that should be played just for the chance of experiencing the life of Tony Montana!

**Cheat mode:** Pause game play, then enter one of the following codes at the "Cheats" screen. Mission cheats are unlocked after playing a mission. Saving the game is disabled while cheat codes are active.

**Cheats**  
 Full health - MEDIK  
 Suicide - KILTONY  
 1,000 Balls, trigger blind rage - FPATCH  
 Full ammunition - AMMO  
 Repair vehicle - TBURGLR  
 Increase gang heat - GOBALLS  
 Decrease gang heat - NOBALLS  
 Increase cop heat - DONUT  
 Decrease cop heat - FLYSTRT  
 Change time of day - MARTHA  
 Rain - RAINY  
 Lightning - SHAZAAM  
 Black suit - BLACK  
 Blue suit - BLUE  
 White suit - WHITE  
 Grey suit - GREY  
 Sandy shirt - TANSHRT  
 Tiger shirt - TIGSHRT  
 Hawaiian shirt - HAWAII  
 Blue Suit with shades - BLUESH  
 White Suit with shades - WHITESH  
 Grey Suit with shades - GREYSH  
 Sandy Shirt with shades - TANSH  
 Tiger Shirt with shades - TIGERSH  
 Hawaiian shirt with shades - HAWAIIIG  
 Real "The World is Yours" music track - TUNEME  
 Bulldozer - DOZER  
 Ariel MK III race car - OLDFAST  
 Odin VH88 dump truck - DUMPER  
 Bodog Stampede - BUMMER  
 Babylon Club Redux level - S13  
 Cabana Cigar/Oakely Drive In level - DW\_FRON  
 Deliver level - S12  
 Freedom Town Redux level - S07A  
 Marina Storage level - F\_M\_SHA  
 Nacho Contreras level - S09  
 Nacho's Tanker level - S10  
 Ogrady's level - DW\_FRON  
 The Dock Boss level - A51  
 Un-Load level - S11

**Get stronger weapons earlier** Some characters like the assassin and enforcer have stronger weapons. For example, play as the enforcer. Call for one of Tony's cars. Once it arrives, go to the weapons trunk. Place the grenade launcher in the trunk, then switch back to Tony. When you go to the weapons trunk, the grenade launcher will still be there. You can do the same thing with the assassin to get the PSG-1.

**Easy money:** Go down the road from your mansion. Make a left turn at the end to the parking lot where the trailer is parked in the corner of the yellowish brick wall. Enable the FPATCH code here. It fills your ball meter. After enabling the code, press E to exchange your balls for money. Repeat this as many times as desired. The higher your rep, the more money you will get for your balls. After selling drugs to a dealer, kill him and take his money and drugs. On the Sandman Island, look for any Sandman leads that have you in a boat. Shoot the targets, then destroy their boats to have two crates appear; one with money and one with ammunition. Collect both crates for a sizable amount of ammunition and money. This is an easy way to get money and ammunition, as you do not have any time limits on the boat missions. Go to the industrial zone and look for the sperm bank. They will give you \$25,000 for your balls. Enable the FPATCH code and just keep cashing in your balls. This will help you buy fronts and exotics quicker. In Little Havana, start at the front entrance of Pedro's pawn shop. Go south until you get to the auto clinic then turn right. At the southern end of the auto clinic building, you will see a yellow pole separating the building and a wall. Run through this small doorway and go all the way to the back to a sperm bank, where you can sell your balls. Keep enabling the FPATCH code and keep selling them. To ensure you get better deals from the drug suppliers, make sure your Gang Heat is low. You will get more products for the same amount of money. This especially helps if your Gang Heat is at zero and your Cop Heat is on zero as well. 30 kg at \$100,000 should net you \$13 to \$15 million. On the island with the docks and winding roads, go by where the docks are located, at the top right corner of the island on the map. Follow the road to the building (the orange spot

with the bank symbol on it). There should be a building with a sign that reads "Bodog." It is a bar. There should be a cage as soon as you walk in. You can bet on cock fights and people fighting. You can bet as high as \$25,000. There is also a casino in that building where you can also make money. First sell the drugs then shoot the drug dealer in the legs. Do not kill him. If you kill him, you will get gang heat. Let your henchmen make the kill. You will not get any gang heat. Call your driver and keep your henchman. Go to the small dealers and sell cocaine to them. After the sale, push them to make them shoot at you. Then, pull out your gun but do not shoot at them. Your henchman will kill them for you. You will not gain any gang heat and will get the cocaine and money.

**Killing gang members**  
Enable the BUMMER code. Then, go after the gangs with it. The gun will have unlimited ammunition and enough armor to take them all out. If you run low on your vehicle's health, enable the TBURGLR code. However, you must move your Hummer once in a while or they will pull you out. This is also very useful when taking over the storehouses because of all the armor it has.

**Taking a car without cop heat**  
The only way to get a car off the road is to get in front of it and push T. Keep pressing it. If the person gets out, you get balls.

**Shark attack**  
Save the game before attempting this. Go into the ocean from anywhere and start swimming, preferably away from land. After a while, a giant shark will appear and eat Tony. In order to avoid a shark attack, if your character is ever stranded in the water, try to stay near large objects or boats in the water while swimming. As long as you are near a large object, the shark will never attack and you will even be able to sprint swim to other large objects (as long as they are not far away), until you get to a place that is out of danger. Also, if you have no soundtrack playing at the time, the music will change to a "Jaws"-like tune. This indicates that the shark is after you; find a large object to swim to quickly.

**Montana investments:** You can find these under the "Exotics" menu, and "Investments" option. The purpose of the investments is to provide upgrades to the game or to your player. You will need at least \$1.5 million (\$40 million for Montana Legal and \$20 million for Montana Sports) to purchase most of these investments. The investments will help you level up faster.

Montana Records: Unlocks new music tracks and create a new playlist.  
Montana Holdings: Fronts will cost you 10% less to purchase.  
Montana Fitness: All your henchmen gain 50% health.  
Montana Productions: Unlocks all of Tony's clothing options in the cheat menu.  
Montana Legal: Visibility Events reduced by half (cops look the other way).  
Montana Sports: Maximum bets go up for all your gambling.  
Montana Financial: Launder all of your cash with 0% interest.  
Montana Defense: Carry an extra weapon and maximum ammunition.

**Fixes**  
Do you get an "out-of-range", "resolution / refresh rate not supported" or similar error message? Try this step by step and retry the game after each step. 1) Click on start -> Run -> type in DXDIAG -> Click OK -> Select More Help along the top -> Click on Override -> Override Value set to 60 -> Click on OK and then Exit -> Try the game again. 2) if your monitor is in Dual Monitor Mode, set it at Single Monitor Mode. 3) In case your monitor doesn't support resolution 1280 x 1024 (which the game starts up with according to forum members), you can try the following (offered by member. Try at own risk):  
HKEY\_LOCAL\_MACHINESOFTWAREVUGamesScarface Click Start, Run, type "regedit" add these two keys to alter resolution right click > new > string value ScreenWidth r/c > modify 1024 r/c > new > string value ScreenHeight r/c > modify 768 a third key: bit depth r/c > new > string value Depth r/c > modify 16

**Tony glows yellow for a short amount of time**  
When running the game with a NVIDIA(R) GeForce(R) FX 5500 & 5700LE, Tony will have intermittent Alpha Transparency problems where he will glow yellow for a short amount of time. This will not affect gameplay in any way and will last only a brief amount of time.

**Sound problems**  
*Sound at intro but not in game* Click START, Settings, Control Panel, Sound and Audio Devices, Speaker Settings, Advanced, Performance, and put HARDWARE ACCELARATION to the 2th stripe (not FULL) **No sound at all** turn hardware acceleration off completely. To do this click Start, Run, type DxDiag and disable AGP in the third tab.

**Unable to complete the Tranquilandia mission**  
While playing the Tranquilandia mission, some of the final drug packages may lose their functionality leaving the player

unable to pick them up, resulting in the inability to complete the mission. If this occurs, please leave the camp so the packages have a chance to un-render and reload. Once this happens, a message will pop up stating that some packages are missing and they should now be properly loaded when returning to the camp. If the problem still occurs, please cancel the mission and re-play. **Shoreline Storage mission problem** During the Shoreline Storage mission, if Tony leaves the mission boundary and comes back, one of the enemy NPCs will spawn inside a building that is unreachable. The NPC can be killed with a rocket launcher if one is equipped, or the mission can be canceled and restarted to fix the problem. **Pedro's Pawnshop mission unplayable** Very rarely, skipping the intro cutscene to the Pedro's Pawnshop mission will cause the mission not to trigger, making it unplayable. If this occurs, the mission must be canceled and restarted. **Tony remains in auto-aim** Locking the desktop [CTRL]+[ALT]+[DEL] while the game is running will cause Tony to remain in auto-aim until the game is exited and reloaded to a previous save. **Tony is stuck in his last action** Activating sticky keys while in gameplay will cause Tony to become stuck in whatever action he was previously performing. This can be fixed by holding down the button that is locked and the button that is opposite of the locked button. Example: If the player is stuck running, hold both the left and right buttons. **Mouse pointer disappeared** Using ALT+Tab while in game will cause the mouse pointer to disappear unless another program is running in the background. This can be fixed by pressing the Windows Key on the keyboard. **Missing items in mansion** Apparently, when the player changes the mansion theme, the items the player bought disappear. This problem has been forwarded to Vivendi. For now, cheat codes can be applied to retrieve the items instantly.
