Severance: Blade of Darkness Cheats (PC)

Big sword, shield, invincibility, plus a lot of cheat codes

Severance: Blade of Darkness is a "scrolling" fighting [third-person](#) PC [action game](#) created by (the now defunct) Rebel Act Studios and published by Codemasters. The original subtitle in direct translation from Spanish is "Edge of Darkness". Unfortunately, there was a TV show with the same title in the USA so the US publisher changed the subtitle to "Blade of Darkness" and the same label was pressed on the European copies as well. Severance has an immediately recognizable fantasy premise with swords, sorcery, and the like. It features four playable characters: Tukaram, a barbarian; Naglfar, a dwarf; Sargon, a knight; and Zoe, an adventurer. Each character starts on a different map, has a different preferences and selection of weapons, and have different strengths and weaknesses in terms of power, agility, and defense and, most important, different sets of combos or moves. As your character progresses through the game, they earn experience points which enable them to increase in level and gain new special attacks and abilities which are executed via combinations of buttons and direction keys, much like a beat-em-up genre game.
