[Sony Ericsson C510 Kate Poses for the Camera](#)

The new device should start shipping next month

It seems that some pictures of Sony Ericsson C510, also known as Kate, a handset reported to be the successor of the [Sony Ericsson K770](#), have emerged to the web, on DailyMobile. According to the news story, the mobile phone is slated to start shipping in February this year.

Thus, the Sony Ericsson C510 should feature a 3.2 MP AF camera and LED and active lens cover along with Cyber-shot UI 2.0. The camera, stated to sport face detection, which goes along with smile shutter and auto rotation when viewing, is complemented by QVGA video and a 2.2" QVGA display.

The new Sony Ericsson C510 comes with a 160 MB built-in memory, yet there is no information on memory card support. Other specifications include picture light, photo fix, illuminated imaging shortcut keys, as well as illumination by different theme/mode. Moreover, the new device also comes with direct blog shortcut key, dedicated shutter key, print service Snapfish and blue illuminated imaging shortcuts.

For those who might not remember Sony Ericsson K770, the phone features a 3.15 MP autofocus camera, 2048x1536 pixels, video, LED flash, and secondary VGA videocall camera, a 1.9 inch TFT display, and includes connectivity on GSM 900 / 1800 / 1900 and UMTS 2100. It also sports GPRS, 3G capabilities, Bluetooth 2.0 with A2DP, as well as USB connectivity.

The new Sony Ericsson C510 should also come packed with a lot of features to make people happy. Among them, one spec that might appeal most to users is the fact that it allows them to download and upload files to YouTube. Not to mention the fact that the phone is great looking in its brushed aluminum casing. According to some voices over the web, it should become a very popular model, courtesy of its good looks as well.

Until it arrives, enjoy the [photo gallery](#) of the handset.
