Spectrobes Cheats (DS)

A list of extra card codes

Spectrobes is an **action**-RPG produced by Japanese developer Jupiter and published by Disney Interactive Studios exclusively for the Nintendo DS handheld console. The game was released on the 13th of March 2007 in North America and Japan, the 16th of March 2007 in Europe and the 6th of November 2007 in Australia. In Spectrobes, the players must train the creatures of light to fight against the creatures of the dark - a not-so-impressive story for the first IP of Disney Interactive. However, the game turned to be a bestseller (over 700,000 copies sold) and many people are still waiting for a sequel to be released (but they only got a Collector's Edition in November 2007, which featured thirty-eight input code cards plus two exclusive Geo input cards, a mini-guide and the game itself, of course). The sequel is expected to be released by the end of 2008. Regarding the cheat codes, both the activation and the way their work are rather strange: we have a complicated entry method combined with a limitation of four codes used per player. So pay attention and use them carefully!

CHEATSCard Codes When you get the chance to wander the planet Kollin, go to the docking ramp of your ship. Next, go down until you can turn right. You are now in some sort of garden. In the middle of this garden is a large tree. Use your Search Spectrobe to scan under the tree. You should find a rainbow sparkle. This is a cube that you can take to Aldous (on your ship) that will enable the card input system. You can use the cards you got with your game and also the following (listed below). Please note: You can only enter each code four times before they stop working.

Items

Aobasar Apex - 2134 DAL Danaphant
 Tuska - 1243 AHE Danilob - 4123 CHK Emerald Mineral - 2134 BGJ Grilden Biblad -
 1243 BED Grildragos Drafly - 3412 IDG Gristar - 2134 AFJ Hammer Geo (must complete
 game) - 1243 AHD Ice Geo (must complete game) - 3412 DAG Inkalade - 1243 CHL Iota
 Cube - 1243 KDA Komainu - 3412 DIF Naglub - 1243 AFI Rho Cube - 2134 LJE Ruby
 Mineral - 3412 BGK Samukabu - 1243 KHE Samurite Voltar - 2134 HDI Sapphire Mineral
 - 1243 BFK Seguslice - 3412 CGL Shakor Bristle - 4123 IHG Spiko - 2143 DEI Vilagrisp -
 4123 AEJ Vilakroma - 3412 HFE Vilakroma (Red) - 2134 JHI Vilakroma (Gold) - 4123
 ACL Windora - 1243 ICL Windora (Green) - 3412 FLI Windora Ortex - 1243 ILD Windora
 Sordina - 2134 IKD Windora Sordina (Green) - 1243 HAJ

If you need help on where to tap, use the following guide: - A is at the end of the upper left arrow. - B is the second from the top left. - C is the second from the top right. - D is at the end of the upper right. - E is under the "A" one space. - F is under the "B" one space. - G is under the "C" one space. - H is under the "D" one space. - I is under the "E" one space. - J is under the "F" one space. - K is under the "G" one space. - L is under the "H" one space. Here is a game-related video:
