## [Spider-Man 3 on the New Nokia N95 8GB](#)

### *Showcasing the phone's amazing capabilities*

To celebrate the launch of the new N95 8GB phone, [Nokia](#) and Sony Pictures Entertainment teamed up and offer the Nokia N95 8GB preloaded with the full-length Spider-Man 3 film, coming in ten languages and subtitle combinations for all Europe and selected countries in Middle East and Africa. The large 2.8 inch QVGA display, the high-quality speakers and the dedicated media keys of N95 8GB make the watching of any movie just like on a DVD. Nokia chose Spider-Man 3 to show off N95 8GB's full capabilities after asking the [Nseries](#) users which film they want to watch on their devices. Spider-Man 3 was voted as the most wanted movie and this is no surprise, as the film has a huge worldwide success. "The Nokia N95 8GB opens up a wealth of exciting options for film fans as they can now watch world-class movies like Spider-Man 3 whenever they want, wherever they want. Pre-loading a film with such fantastic special effects truly shows off the device's advanced capabilities. With its ground-breaking features, users can now fully appreciate the meaning of entertainment on-the-go," says Ilkka Raiskinen, Senior Vice President, Multimedia Experiences, Nokia. Besides the full-length film, the Nokia N95 8GB also comes with a unique Spider-Man 3 message and ring tone, screen saver and wallpaper, specially created for the new handset. Furthermore, Spider-Man 3 games, additional videoclips and ring tones will also be available for download in selected countries. The Nokia N95 8GB offers a DVD-like quality video capture that enables anyone to make movies and share them with friends via the transfer to PC functions. With its eight gigabytes internal memory, the new Nokia N95 8GB lets us enjoy more movies and more music than ever and will take mobile entertainment to the next level.
