## [Spider-Man Cheats and Hints \(PC\)](#)

### *Different codes and tips & tricks*

Spider-Man is an action game based upon the [Marvel](#) Comics character, [Spider-Man](#), and is directly based on the first feature film starring the character. It was developed by Treyarch and released in 2002 for PC and several video game consoles. The game has many scenes and villains that did not appear in the film. Spider-Man is a level based action game, with you playing as Spider-Man. Most levels are indoors, but some levels require you to web-sling from building to building. Levels are in "sections" with a different enemy for each, each section lasting about 3 levels. ([Wikipedia](#))
