[Sprint Customers to Receive Satellite Radio by Sirius](#)

The news partnership between Sprint Corporation and Satellite Radio Inc. will offer satellite radio to Sprint customers and cell phone users.

- Sprint Corporation announced a new partnership with Sirius Satellite radio Inc. that will offer some of its customers the possibility of receiving satellite radio over their cell phones. The deal, which is the first one to have been struck between a wireless corporation and a satellite radio company, is set to expand Sprint's wireless entertainment package. The two companies have already thought of some music channels for the new service that should include latest top hits, and other genres from hip-hop, blues and soul to country music, jazz or even Broadway's best music, according to Forbes. "One of our goals is to make this unique content available to as many Sprint PCS Vision customers as we can, over as many multimedia devices as possible", stated Scott Greenstein, Sirius President of Entertainment and Sports.
