## **Superstar Nail Lacquer, the Perfect Mood Fixer**

*Quick dry and in bold colors, truly every girlâ€™s dream come true*

All women out there who ever had their manicure done at least once in their lifetime (and it's unlikely that there is one who hasn't) know how annoying it can be when you either want a new color for your nails, or you want to have them done as quickly as possible. Thanks to StyleShoppe and its most recent offer, the Superstar Nail Lacquer, we can now have both at a more than accessible price.

The Superstar Nail Lacquer was introduced on the market last summer but, thanks to the growing popularity it has enjoyed (understandably, because of the price and on the grounds that it makes plenty of room for the expression of one's individuality), we now have the chance to enjoy two Christmas special sets. The Superstar Bold Colors Gift Set and the Superstar Metallic Colors Gift Set are priced at \$25 each, and include five of the best sold colors from the entire collection, certified to put you in a bright mood with each application.

The bold colors edition, for instance, includes Ari's Amethyst, Park Avenue Purple, Paparazzi Pink, Stacia's Hollywood Pink, and Miami at Midnight, while the metallic hues one comes with Golden Globes, Silver Screen, Walk the Red Carpet, Gucci Green and French Fashionista. Also noteworthy is that, aside from being quick dry and reportedly extremely resistant to shocks and in time, this nail polish is also both "user" and environmentally friendly, in that it is Toluene and formaldehyde-free.

Touted as a "busy gal's dream come true," the Superstar Nail Lacquer also ensures an easy application, while its formula is guaranteed to offer women the desired "long-lasting luxe." However, if this latest offer is not exactly what you had in mind in terms of nail polish, you can also choose from the individual samples available online, which come in even more and daring shades. Priced at \$8.50, these too offer the same awesome quality you'd get with the special Christmas gift sets.
