[Surf's Up Cheats \(Xbox 360\)](#)

A list of helpful codes

Surf's Up is a video game based on the animated movie with the same name. It was developed and published by Ubisoft on multiple platforms, released on the 29th of May 2007. It is basically a [sport](#) game developed using the Unreal Engine 2.5, and it is not necessarily related to the story of the movie. An interesting aspect of the title is that it was one of the last games to be developed for the Gamecube. Gameplay is pretty simple and straightforward: the controls are similar to skateboarding games and players are tasked with achieving certain goals or collecting a specific number of trophies in order to progress. Unless you are a fan of the genre or of the movie, you will probably get bored pretty quickly of this game. We know that true gamers play all these games just for fun, as they should, and not in order to achieve specific point landmarks to prove to their friends they are very cool, but we also know that sometimes you just can't live without achieving everything possible with a title you really enjoy. If that's the case and you want to know exactly what to look for when it comes to this game, we have prepared a full list of cheats for you. Good luck!
