One of the old and great driving simulators

Test Drive Le Mans (known as Le Mans 24 Hours in Europe and Australia, as the Test Drive license was only used in North America) is a videogame released for the Sega Dreamcast, Sony Playstation, Microsoft Windows PCs and the Game Boy Color. Based on the famous 24 hours of Le Mans race in France, the player is invited to race the entire 24 hour endurance course or take part in a simpler arcade mode. The 24 Hours of Le Mans (24 Heures du Mans) is a famous sports car endurance race held annually since 1923 near the town of Le Mans, Sarthe, France. Commonly known as the Grand Prix of Endurance, it is organized by the Automobile Club de l'Ouest (ACO) and run on a circuit containing closed public roads that are meant to not only test a car and driver's ability to be quick, but also to last over a 24 hour period. **The race** field has usually consisted of approximately 50 competitors. Each car is required to have no more than two seats, although in recent years only the ability to place a seat in the cockpit has been understood but not enforced. No more than two doors are allowed either, although open cockpit cars do not require doors.
