Wii

[The Sims 2: Castaway Cheats \(Wii\)](#)

To survive you must make your own story, build a shelter, cook fish, make fire and escape... or stay

[The Sims 2 Castaway](#) begins when your Sims are washed ashore and must overcome the forces of nature, craft tools for survival, and explore their surroundings to unravel the island's mysteries. They'll learn to build a life from scratch in an undiscovered paradise while unearthing clues that will lead them back to civilization. By discovering the many useful treasures and ancient mysteries hidden deep within a diverse jungle, your Sims will discover all the things a tropical island has to offer, including plants, fruits, wildlife and more! From tattered clothing to sunburned skin, your Sims will change as they take on the many challenges of tropical island life and learn to survive in style. For seven years the sims have been living in the suburbs, but in the year 2007 their lives are going to change forever. On a cruise trip your crew of sims are shipwrecked, on a uncharted chain of islands. To survive you must do the skills and also make your own story, build a shelter, **cook** fish and make fire, but at the end you must decide: escape, or stay? **Cheats Cheat Gnome** Quickly press B, Z, Up, Down, B while on a lot to spawn the Cheat Gnome. It appears at different locations, depending on which island you are on, and must be found. The following codes can be enabled, which will unlock the corresponding options on the Cheat Gnome after it is found. **All motives** Quickly press Minus, Plus, Z, Z, A. **All plans** Quickly press Plus, Plus, Minus, Minus, Z. **All crafting resources** Quickly press A, A, Down, Down, A. **Maximum current food and resources** Quickly press Left, Right, Left, right, A. **Maximum relationships** Quickly press Z, Plus, A, B, 2. **Add one to skill** Quickly press 2, Up, Right, Z, Right. Here's the trailer below, containing a few details about the NDS version as well:
