## Theme Hospital Cheats (PC)

*Different codes to make your gameplay experience easier*

Theme Hospital is a [simulation](#) computer game developed by Bullfrog Productions and published by Electronic Arts in 1997, in which the player designs and operates a hospital. Like most of Bullfrog's games, Theme Hospital is permeated by an eccentric sense of humor. The game is the thematic successor to Theme Park, a game also produced by Bullfrog.

The game is set in a hospital, and requires the player to build an environment which will attract patients with comical complaints, illnesses, emergencies, and diseases. The game has a somewhat dark [sense of humor](#), which is similar to that of Theme Park in many ways. The player has no direct control over the patients that wander the hospital, although the gameplay largely centers on influencing their actions in one way or another.

Jump to end of month - *Ctrl + M*

Jump to end of year\* - *Ctrl + Y*

All items - *Shift + Ctrl + C*

\*Press 1, 2, or 3 repeatedly after enabling this code to view all award messages.

### **Jump to a rat shoot level after the current level**

Enter 7287 into the fax machine and activate the green button.

### **Level select**

Start the game using the hospital -L command line.

### **Level skip**

Press C on the board game screen before a level starts. Then, click on any part of the board to advance to that level.

### **Bonus level**

When you are brought up with the fax machine, click on the buttons 24328, Green Button, 7287, Green Button, 999. You will hear a telephone ring louder than the others to confirm correct code entry. When you complete the level, you will be brought to the "Rat Shoot" level. Finish that level, and you will be brought back to the game board. However, this time you will see your pointer. Hold C and click on the other piece (to the left of the screen and in the shape of a lady that is green). If nothing happens, release C. If done correctly, you will see a short FMV sequence and will be brought to a secret level. The game may restart after a while, but it will not damage your progress. If it does not reset, you will eventually see pregnant women.

Here is a gameplay video:
