Tropico 2: Pirate Cove Cheats

A Blackbeard story

The Caribbean Islands are not just the spot for blooming tourism and great music. Back in the 17th century, these islands were also the home of pirates. Well, once you've been El Presidente, you can safely stir things up a little by becoming the Pirate King. In Tropico 2: Pirate Cove you give up on plantations and high educated workers for your factories and concentrate on plundering the wealthy merchant ships that come too close to your secret island. It's still the Caribbean, it's pretty much the same game engine, but it's a totally different story and definitely another gaming experience. Here you'll need to keep your scurvy buccaneers satisfied with rowdy gambling, jolly feasting and barrels of Rum. To get a profit you have to send your renegade sailors out on the sea and pray they'll come back alive and with a pretty loot. Since the world powers had enough of your high seas robbery they'll take actions against you and try to capture every captain you have and sink all the vessels under your control. So, get a look at the following cheat codes as the seas aren't safe anymore. Your happiness lays a few clicks away. First of all press **CTRL and SHIFT** then type the code of your dreams: **booty** - get 2000 gold **timber** - get 100 lumber **freebuild** - turn off normal building rules **normbuild** - turn on normal building rules **goape** - the selected pirate becomes enraged **frenchinv** - French invasion **britinv** - British invasions **spaininv** - Spanish invasion **winit** - automatically win the game **loseit** - automatically lose the game
