TwinMos Rolls Out the Mobile Disk P1 USB Drive - Blingy, Mirror-Like

And mostly designed for the most fashion-conscious users

It really seems that bling sells, and sells a lot, since an increasingly higher number of various electronic products manufacturers come out with all sorts of products that, besides providing interesting (and somewhat useful) internal features, also come "packed" in a very attractive (and rather unusual) external casing. And that's exactly the case with the latest offering from memory manufacturer TwinMos, whose Mobile Disk P1 USB flash drive comes in a very shiny package, which compliments the very large storage capacities this thing can provide. Thus, the drives from the new Mobile Disk P1 series feature a very sleek and smooth (almost mirror-like) external casing, as well as no less than 6 activity LEDs, which create a pretty interesting visual effect whenever data transfers are being carried out. Thus, its overall aspect recommends this particular family of storage devices especially for the more fashion-conscious of users, those people who want a device that will also draw other people's attention, besides carrying around their data. Now, after taking a look at the drive's external appearance, it's about time to see what it can actually do. Thus, the TwinMos Mobile Disk P1 will be available in several models, with storage capacities of up to 32 GB (although just a 4 GB-version has been released for the time being), and, much like most of the other devices of this type, connects to a host computer via an USB 2.0 interface, thus being able to attain maximum data transfer rates of up to 480 Mbps. Furthermore, the flash drive supports an optional password protection system and works with the most popular operating systems on the market, namely Windows /2000/XP/Vista, Mac10.1+ and Linux 2.4+. It's also very portable, measuring around 60 x 21.63 x 8.8 mm. There's no word on just how much this thing is going to cost when it finally hits the shelves, but it will most likely cost a bit more than the company's other current offerings. We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
