Is this her - and is this whole story for real?

Vanessa Hudgens - Photo Leak Number Three

Man oh man, Vanessa Hudgens is a party animal. And I mean that in the literal way. Not only did she make the stupidest thing in her life when she took some revealing photos of herself which - of course - ended up online and outraged people all over the States and not only, but now even more shocking news has emerged. It has been alleged that the photos of Vanessa were not taken recently - and therefore were not destined for the delight and relaxation of boyfriend Zac Efron. In fact, a source close to the whole mess declared to People magazine that Vanessa took the scandalous nude and not only photos of herself for the benefit of Nickelodeon star Drake Bell. In 2006, the actress appeared in an episode of Bell's Nickelodeon show as his character's girlfriend and was reportedly smitten with her co-star. So much in fact that she wanted to further make the guy drool - and took the photos of herself which we've all seen - and E-MAILED them to him. That's right - emailed them to him, thus allowing Bell full possession of her naked self. I take it back - Disney should fire her, not for the whole amateur photo shoot thing, but for having such a low IQ. Who wants to bet it was Bell - or someone in his entourage - who leaked the photos? And there was me thinking someone sneaked into her room in the dead of the night and infamously stole the photos in question. I think I've watched one too many James Bond movies, didn't I? Bell's representative, Jill Fritzo, predictably stated that "Drake says he never received those photos". Of course he would state that - at least his IQ is higher than hers is, so he must have realized those pictures are still worth quite a lot. Which just leaves one question to be answered. Vanessa Hudgens took naked pictures of herself in order to get into a guy's pants when she was 16??? That makes us all a bunch of pedofiles - and it seriously questions Miss Hudgens' overall perspective on life, sex and love. Kidding. It just shows us that it never pays to trust someone's (media-enhanced) image. And, just as a treat, here are some more naughty photos of darling Vanessa - or at least we assume it's her - just because. Enjoy.
