Different things to unlock within the game

WWE Raw (also known as WWF Raw) is a video game released on the Xbox console and the PC by THQ in 2002. All copies of the PC port and later copies of the Xbox original were titled WWE Raw due to the World Wrestling Federation's lawsuit with the World Wildlife Fund, causing the former to change their name to WWE (although the in-game logos still carried the WWF logo). The game was succeeded on the Xbox by WWE Raw 2 in 2003. The game received mixed reviews. Some players praised the game for its fantastic graphics, which included detailed tattoos and hair, along with such features as attacking a wrestler during his/her entrance and stealing pieces of attire, such as Kurt Angle's gold medal.
