The heroine

Wet Attack Cheats (PC)

Money, invincibility and other codes

The player begins by stealing a spaceship, named "The Tit", then begins searching for Lula, who is lost in space. Following leads, the player travels from planet to planet, picking up cargo and selling it for a profit. Sometimes the cargo includes contraband, which pays well, but it is risky. From time to time, the spaceship is attacked by pirates who try to steal your cargo or girls. You have to hire a crew for the ship, a gunner and an engineer, and **keep them happy**. The crew is all female, so you have to "keep them happy" yourself, or you may hire up to 3 gigolos if you prefer getting on with the mission. This helps keep your ship together. You can also buy upgrades for "the Tit": engines, guns, shields, spy satellites etc. After a while, you can buy a "second Tit", doubling the size of the ship. While docking at a planet, your ship doubles as a brothel. You have to hire girls to work in the bedrooms, and keep them healthy, sexy, and satisfied. You have to assemble a full-body ship before you can save the lost Lula. ([Wikipedia](#)) Please note: The game might be referred to as "Wet Attack - The Empire Cums Back", since this is its full name. **CHEATS** Enter one of the following codes at the isometric adventure screen or 3D screen (as instructed below) to activate the corresponding cheat function. **Isometric adventure screen codes** \$1 Million - jackpot People go to the brothel - freebeer Faster games - makeitfaster Faster clock - likearabbit **3D screen codes** All visible enemy ships destroyed - armageddon Enemy ships destroyed with one hit - bomberman Pirates do not attack during flight - peace Invincible ship - diffuse Enemy ships stop - freeze **Advance to next to last sun system** Press Alt + W while in a warp portal. This is the main heroine of the series, the sexy Lula:
