## Wii Sports Cheats and Unlockables (Wii)

### *Wii'll cheat till we win*

Addiction! That's what **Wii** Sports has got written all over it. It also changes that prejudice that created the image of a fat gamer slowly becoming a couch potato. With Wii Sports not only will you be losing weight, but you will also play one of the most entertaining sports games around. Play tennis, bowling, baseball, golf or try the boxing game to create a muscle-twitching experience. Feel cheated by the same guy that kicks your ass when playing tennis? Use those **cheats** or open up all the unlockables to make this game more fun than it already is.

**Unlockable: Special Bowling Ball**You must achieve pro level on the bowling game.  
**Unlockable: Tennis court**At the warning screen after selecting characters, hold down 2.  
**Hint - Barrier Strike**For the 'Power Throws' training game in bowling, turn either left or right until there are four red bars pointing in the direction of your choice across the bowling line. This may not always work, especially with the big numbers of pins but this will almost always give you a strike. Feel free to experiment with different numbers of red bars across the bowling line since three and four almost always work for me.  
**Hint - 91 Strike**In the "Power Throws" training game for bowling, you might notice 2 red buttons at the end of the alley - 1 left and 1 right. When you get to the final bowl for 91 pins, you can bowl the ball along the top of the barrier on either side and hit this button. Move your Mii all the way to the left or right, and turn the aim 2 or 3 clicks towards the barrier. Let go of the ball at the highest point possible, with just a bit of spin to keep the ball on the barrier. If successful, you will hear a click, the screen will shake and all the pins will fall down.  
**Mii Parade**You can add more Miis in Parade and audiences. Use Wii Sports to do it: 1. Make about 10 Mii's. 2. Transfer those Mii's to your Wiimote. 3. Delete the Mii's that are transferred to the Wiimote out of the plaza. 4. Start up Wii Sports. 5 When given the option of which Mii to use during gameplay choose the option to get the Mii from the Wii Remote. 6. After viewing the Mii's on the Wiimote back out by using the B button. 7. Exit out of Wii Sports and back onto the Wii Menu. Now check the Mii parade and all 10 of the Miis that were on the Wiimote are in the parade. Now if you dont want the Miis on the Wiimote just delete them off. These Miis will now show up in all Wii Sports games that have an audience.  
**Bowling Ball Color Change**You can select your bowling ball color before you bowl by using the directional pad. When you reach the screen warning, 'Make sure nothing is around you', hit the A button and hold the D-pad (until the alley UI appears) to choose your color: UP = blue LEFT = red DOWN = green RIGHT = yellow  
**Hint - Tennis Pro Tips**When playing tennis and building your skill level, you can quickly gain skill points by setting it up so that your Mii is both players on a single side. After orienting yourself to this type of gameplay (it takes some coordination), you will notice that your wins will earn you 40+ skill points each time - basically double what you would have gotten if you had played with the computer on your side. To do this trick: When you select which type of game to play, "Single Game", "Best of 3", or "Best of 5", it shows you which players are at which locations on the court. Your Mii's default position is the left side server. On the same side, use the A Button and click on the figure standing at the net. It will change from the "?" shadow to your Mii (assuming you are playing alone). Then proceed to pick which duration of tennis you'd like to play. Note that you should ensure that you win, otherwise you may be at risk to lose double the amount of skill points if you lose. Check out some crazy tennis over here:  
**Codes**  
**Change the tennis court**To change the tennis court to the blue practice court, press and hold (2) at the warning screen that shows after selecting characters.  
**Play Golf without maps or meters**To disable the power meter, map, and the wind speed indicator, press and hold (2), then make a selection at the "Select a Course" screen.  
**Silver Boxing Gloves**After

you've beaten the Grand Champion, Matt, in a boxing match you'll be able to wear silver boxing gloves. To do so, hold (1) when the screen becomes black before a boxing match.

**Unlockables**  
**Special Bowling Ball** Get to pro level to unlock a bowling ball with diamond designs on it.  
**Easter Eggs**  
**Amuse Crowd in Bowling** To make the crowd laugh in bowling, move to either of the gutters in your lane, turn into opposite lane, and bowl so the ball goes over the barrier between the lanes. The ball will go into the gutter in the opposite lane and the crowd will laugh.  
**Scare Crowd in Bowling** To scare the crowd while bowling, start the regular motion for bowling and let go on the backswing. The ball will fly backwards and the crowd will scream and jump.
