[World Championship Poker Cheats and Unlockables \(DS\)](#)

A list of codes and things you can unlock while playing

World Championship Poker is a game developed by Coresoft and published by Crave Entertainment in 2005. The game has been met with varied reviews, people generally complaining about the single-player part of it but enjoying the multiplayer setup which is quite entertaining (just like any other game). The game has been released on numerous platforms and poker fans worldwide welcomed the opportunity to test and improve their skills while playing the virtual thing. You probably know that playing poker, real poker, getting to face the tension constantly growing with each hand you play (especially when losing), couldn't be felt yet in a poker video game. Well... things are about to change, since WCP2 comes with a great feature: it has webcam support, which means that online players will be able to see each other, analyze their facial expressions, gestures and so on. The most important aspect is that they will be able to see those drips of sweat when their opponents start to lose or bluff the hell out of one hand.

UNLOCKABLES
Nebula secret chips Go next to the tournament table in the Wild Corral casino. Use the map to find the northeast corner of the room and look at the floor. You will find a red poker chip that allows you to enter the Nebula. Please note: You may first need to play some of the Wild Corral tournaments in order to find the chip. Alternately, enter the Air Hockey room from the right side entryway. Look at the floor of the right wall to find a red poker chip. Pick it up and you will be able to enter the Nebula.
