GAMEPLAY HINTS

Warlock: Easy kills When you are a Warlock, use your Fireballs and Drain Soul powers at a time on an enemy. You must do some quests to get some of these powers. Note: This works most, but not all, of the time.

Enchanting Give away free Enchants if people provide the materials or wait till you are over level 40 and have a mount and can use it. Then, buy lots of the same materials and repeatedly enchant the same item with the same enchant until it does not level you any more. Then, repeat the process. This will get you to a high Enchanting level quickly.

GLITCHES

Float in midair First, get to the Great Lift area in Thousand Needles. Wait for one of the lifts to go down and come back up. Try to jump on the lift as it is coming up. If you are successful, you should fall through the roof and go to the wooden floor. Do not move. When the lift goes down you will be standing at the top of The Great lift. If you move, you will fall and kill yourself.

Goblins twitch After you kill a goblin such as a Grell or Grellkin from Telldrassill, look closely at the body. He will still blink and his thumb will slowly move up and down.

Endless freefall Make a Night Elf character, the class does not matter. Level up enough so that you will not die in the next area. Then, run to the next town and keep going east until you reach the cliffs. Use that grassy parts of the cliff to run up to a certain section where the map is suddenly cut off. Jump off this cliff. You should die and restart at the graveyard. Run back to where you jumped, then jump off again. You should now be in an unending free fall. Exit the game and delete this character, because when you log in again your character will still be falling. Here is a WoW video:
