[X300SE Dual DVI from HIS](#)

Game for Glory

HIS (Hightech Information System Limited) introduces HIS X300SE Dual DVI PCIe. This unit brings the possibility of connecting two digital LCDs. The HIS X300SE Dual DVI is said to be the best cost saving solution for you. According to the company, you can get the most from your gaming, digital photography, video editing and web surfing experiences with this new product, an affordable graphics solution featuring ATI's industry-leading performance, technology and support. The HIS X300SE Dual DVI fully supports the PCI Express bus, the newest PC industry standard for delivering maximum real-time performance for your graphics-intensive software applications. Also, superior visual output is one of the aspects of HIS X300SE Dual DVI series, that allows you to get the most from your digital still and video cameras, "enabling you to see the true brilliance of your creativity, whether you are editing a video or previewing a photo before printing." These HIS series push high-end monitors to their full capacity and maximizes the visual display capabilities of your digital input devices. The X300SE supports the latest game titles and combines ATI's SmartShade and SmoothVision technologies to deliver incredible processing power and stunning 3D image quality. It also fully supports Microsoft DirectX 9, ensuring that games look and play great, especially in high-definition. Here are some of the features: Powered by ATI Radeon X300 SE VPU - 325MHz; 128MB-64bit DDR memory - 400MHz; Four parallel pixel pipelines; Two vertex shader pipelines; SMARTSHADER 2.0; SMOOTHVISION 2.1; HYPER Z III; VIDEOSHADER; Native x16 lane PCI Express; DirectX 9 and OpenGL supported; VGA, TV-Out and DVI-I supported; Software bundled with the card: Dungeon Siege Full, 3D Album Picture Pro, PowerDirector 3 SE Plus, Power2Go 4. Also, an S-Video cable and a conversion cable Mini-Din to RCA are included in the package.
