[Adult Content for Mobile Phones Soon Available](#)

Content will include Bikini Cocktail Videos featuring top celebrity models

XLR8 Mobile and Brickhouse Mobile announced a multi-year deal to bring XLR8 Mobile's content to mobile phone users around the world. The announcement was made by L.R. Clinton Fayling, Brickhouse Mobile's president. "We're excited to introduce XLR8 Mobile's unique [content](#) to our worldwide distribution channels. Sexy original programming starring adult entertainment celebrities is a formula for great success. These products are sure to be a hit with mobile operators and consumers alike," he said. The content offering will span the glamour, topless, nude and softcore categories and will include Bikini Cocktail Videos presented by top celebrity models providing bartending tips, as well as a range of other products, featuring Andrea Lowell Mobile Content (Star of VH-1's Surreal Life), Charmane Star Mobile Content (Vivid Films Star) and October Media Group Content (Former Playboy Show Host). The content will be available via carrier decks in domestic and international markets. "XLR8 Mobile always chooses partners who are best-in-class," commented Perry Tell, CEO, XLR8 Mobile. "Our mission is to sell mobile content to the widest possible audience. We know there are other distributors out there, but Brickhouse Mobile has all the attributes we look for in a partner, and they stand head and shoulders above their competitors. The devil's in the details... and they take the extra steps to market our [content](#) to the extreme. They run a great business, and we are proud to be a part of it." Brickhouse Mobile and XLR8 Mobile are currently working with industry associations, carriers and governmental organizations to ensure that all the published content complies with current U.S. and international standards. In addition, Brickhouse Mobile will help XLR8 Mobile implement solutions that will ensure that content can only be viewed by an audience of appropriate age. Age verification will include the use of a credit card and user information registration via [WAP](#) branded sites.
