iSee 360: See the Difference

Takes the iPod to a whole new level...

Ato has released a new accessory for the iPod that is sure to catch everyone's eye. The iSee 360 is a small device that allows the docking of any Pod other than the Shuffle, turning it into a full-fledged video recorder/player. Just slide your Pod in one side and flip it over for a 3.6" high quality LCD screen that provides bright, vivid viewing. The best thing about it is that it works with all models of the iPod, playing all kinds of media from music to images and movies. It can be connected to a TV, and the link works both ways, meaning that not only can you see everything on your TV, you can also use it to record compressed video directly to your iPod for playback. The sleek device converts the iPod into a mass media storage device, without looking like a shabby add-on accessory. In fact, the all in one 'all in one' look is great, especially if you have a black Pod, and it even has its own rechargeable battery so that it doesn't eat off the iPod one. Here are the full technical details:

- Play video with sound, using the iPod's headphones or external speakers.
- Record TV shows directly from your TV for playback.
- Record compressed video to your iPod for playback.
- Playback movies on your TV.
- Download and play movies, music videos, photos and music from your PC and the web.
- Zoom in and pan your photos, create and play slide shows.
- 3.6" high quality LCD screen provides bright, vivid viewing.
- Lightweight mobile design - iPod slips into the back of the iSee 360, creating a sleek, compact, all-in-one appearance.
- Replaceable, rechargeable 2400mAh battery delivers 4 hours battery life, without using power from the iPod battery. AC adapter charges iSee and iPod at the same time.
- User-friendly GUI lets you navigate quickly and easily.
- Video in/Video out lets you record from your TV, VCR, or TiVo and playback on TV.
- Multiple video formats include MPEG-2/4 and Windows Media 9/10.
- Audio in/Audio out lets you record audio from any analog source, listen to audio on any external system.
- Software included - VidiScape host application and AcrSoft audio/video conversion software are on included disc.
