

## 2014 Easter Giveaway results for Ad-Aware Pro Security 11

The following comments were excluded from the calculation: entries lacking an email address, entries with duplicate email addresses (however, the original entry was included in the calculation), multiple entries that shared slightly modified email addresses but that were obviously inserted by the same user (however, the original entry was included in the calculation).

NOTE: We have generated 120 winning numbers in total. Only the first 100 users will receive emails with the 100 available licenses, as shown in the first list below. If some of the email addresses from these first 100 users prove to be invalid, their corresponding license keys will be resent to the 20 users (the last 20 out of the 120), in the order highlighted in the first list below. The Random.org numbers are matched against the column numbers 1->427 (see secondary list with participants).

Set of random winners generated via random.org:

The screenshot shows a web browser window with the URL `www.random.org/integer-sets/?sets=1&num=120&min=1&max=427&seqnos=on&con`. The page title is "RANDOM.ORG - Integer S". The main heading is "RANDOM.ORG" with the tagline "True Random Number Service". A navigation menu includes links for Home, Games, Numbers, Lists & More, Drawings, Web Tools, Statistics, Testimonials, Learn More, and Login. A search bar is present with the text "Search RANDOM.ORG" and a "Search" button. A green banner below the search bar says "Do you own an iOS or Android device? Check out our new app!". The main content area is titled "Random Integer Set Generator" and contains the text: "You requested 1 set with 120 unique random integers, taken from the [1,427] range. The integers were not sorted. Here is your set:". Below this, a list of 120 integers is displayed, with the last 20 integers highlighted in yellow. The timestamp "Timestamp: 2014-04-22 09:34:24 UTC" is shown at the bottom, along with "Again!" and "Go Back" buttons.
